

Concept

- Simple, Slim and Curved Form
- State of the Art Polycarbonate material
- Elegant in Design
- Corrosion Resistant
- Heat Resistant
- Impact Resistant

Sensous curves
that set passion alight

About Schneider Electric

As a global specialist in energy management with operations in more than 100 countries, Schneider Electric offers integrated solutions across multiple market segments, including leadership positions in Utilities & Infrastructure, Industries & Machines Manufacturers, Non-residential Building, and Data Centers & Networks and in Residential. Focused on making energy safe, reliable, efficient, productive and green, the Group's 140,000 plus employees achieved sales of 24 billion euros in 2012, through an active commitment to help individuals and organizations make the most of their energy.

The LifeSpace Business of Schneider Electric provides solutions that represent the best in lifestyle and innovation for offices, hotels and homes. These solutions include award-winning products in the areas of building and home automation, structured cabling, and designer switches and sockets. They help the finest architectures around the world to achieve more with less.

Electric

Concept Series

Sensous curves that set passion alight

The plastic parts of Concept are made of polycarbonate, a material superior to the commonly used ABS. With excellent impact resistance, polycarbonate has a well balance between tensile strength and flexural strength. It also has a wider temperature tolerance range and a good resistance chemical to attacks.

Being impact resistant, heat resistant, and corrosion resistant, Concept is made to stand the test of time.

Easy and hassle-free installation

The mounting holes are reinforced with metal which avoid the risk of grid plate damage during installation. They are oval-shaped which enable easy fixing level adjustment. Cater to user-friendliness, Philips head screws are used for flat or cross screw drivers.

Front installation of modules facilitates a smoother installation process. It prevents module from "sliding into the wall" after a long period of use.

S-Flexi Series

The right tool for you

Made with high quality Polycarbonate (PC) materials, S-Flexi switches and sockets are virtually unbreakable. They are tested to comply with the IEC safety standards, ensuring maximum safety and reliability.

The unique FlexiFix module-mounting design allows you to position the modules anywhere along the inner slots of the grid plate. This, together with the standardised sizing of the modules, gives you an interchangeable modular system with flexibility to create your switches and sockets the way you want them.
